

New PlayAway All in One Format Audiobooks

Like listening to books?

We have a new way for you to hear readings without a CD, cassette or MP3 player. The book comes preloaded on its own pocket-sized player with fairly simple control buttons. You can rewind, fast forward, etc. and the book stays in place when stopped. The library even supplies the batteries.

You need your own headphones which we do not lend for sanitary reasons. If you don't own headphones, the library sells a small selection of headphones for \$3 a pair. Once you have a set you don't need another unless you lose them or they wear out.

For this trial collection the library has nearly 100 PlayAway audiobooks for your edification from classics such as Charlotte Bronte's *Jane Eyre* and the *Illiad* of Homer, to thrillers by Agatha Christie and Dan Brown. To look at what we have in the catalogue select subject keyword and type "playaway". They are shelved near the shelving carts.

Try one out and let us know how you find it. How do they compare with cassette, CD and MP3 audiobooks? We always value your thoughts.

Remember we have a large selection of other audiobooks formats including Books on Cassette (534 adult and 224 juvenile titles), Books on CD (576 adult and 137 junior titles) and MP3 CD (13 titles). Your library card also provides access to two downloadable audiobook collections. Ask at the Information Desk for details
